12-20-97	03:30	Front Entrance	No code used

Both the front and rear entrance doors to the apartment building are locked 24/7. They are never left unlocked for any reason unless authorized by myself, the building manager. Each resident is given the 4 digit key code to unlock the doors. The same code can be used at either door. They are also given a standard cut metal key that will also unlock the door but this will not show as code used to open. Also when a person exits this will not show as code used to open as you do not need the code or key to exit. The above door opening times are shown up until when the police and medical support teams arrived.
